## PROPOSED REALIGNMENT PLAN 2021-2022

Please be advised that after the revised workload percentage numbers are received from the AOPC, any Magisterial District Judge who is below the total workload percentage may be required to cover additional days in Central Court, consisting of criminal preliminary hearings at the Courthouse and additional Night Duty, at the discretion of the President Judge, in order to equitably distribute the work load amount between the Magisterial District Courts. The other aspect of distribution of work load that may be considered by the President Judge is to designate which Magisterial District Judge will provide office coverage for the Magisterial District Judge on call during any given week.
